

PLUG-IN TRANSMITTER WITH 16CH SELECTABLE PLL OPERATING

FEATURES:

- ※ Professional XLR connector match with all dynamic microphones
- ※ Ultra-light, glass fiber reinforced miniature case
- ※ Integrated charging contacts
- ※ Extremely low operating cost

The WT-1 plug-in transmitter is probably the most cost efficient way to upgrade a hardwire microphone for wireless use. All you have to do is disconnect the microphone cable and plug the transmitter into the XLR connector on the microphone. The plug-in transmitter with its small and light glass fiber reinforced case will add less weight to the microphone than the cable did.

An input gain control lets you match the WT-1 to the microphone output level. A noiseless on/off switch allows you to mute any microphone with no on/off switch. Replaceable color code elements allow easy identification of the various microphone channels in any multichannel concert setup.

PLUG-IN TRANSMITTER SPECIFICATIONS

Frequency Range: 460-970MHz
RF Output: 10dBm
Modulation Type: FM
Max Deviation: ± 68 KHz
Spurious Emission: > 55 dBc
Nominal Current Drain: < 100 mA
Power Requirements: 1x1.5V AA
Dimensions: 11.2x2.9x2.8cm

WT-1 TRANSMITTER

16CH/PLL

Recommend to work with the receiver of KRU-161 or KRU-3
